

# Press

## Project : Tryout Press

<b>Type</b>	4-point link motion	<b>Capacity</b>	2300 Ton
<b>Stroke</b>	700mm	<b>S.P.M</b>	10-18SPM
<b>Bolster</b>	5000x2500mm	<b>Carrier (4 sets)</b>	2 sets : T-cross moving 2 sets : T-side moving

### Features

Tryout Press are specially designed for usage in the die shop and are valuable tools for the die-makers. Die-makers run tests with them at different stages of die production.

Several sets of dies can be simultaneously tested and repaired through the use of these presses, greatly improving production efficiency.

The die changing process is fully automated.

The computerized numeric control permit the automatic die selection and various setting for the presses.
